

Standard Colour Chart

Turn over for more details >

Do you require an exact colour? We make it easy!

Berry M&H offers full assistance in matching colours and tints to your exact marketing vision. Across is a chart featuring a selection of some of the different colours available but we can also match to any Pantone® reference or to a physical object to meet your specific requirements.

The base colours of plastic are clear (PET, PETG, PCTG, PVC) or natural (HDPE, PP, PE). All products can be manufactured in colour with the addition of coloured masterbatch.

We have created the chart featuring selected colour options as a guide to some of the different colours you may wish to consider and are able to supply colour plaques of these.

Accurate colour control is critical to many projects and is an essential part of ensuring brand integrity. When several types of packaging are used for the same customer or brand, it is the accuracy of the colour matching which creates a unified brand identity. This requires packaging manufacturers skilled at matching colours with different polymer bases.

The colours shown do not include transparent tints which are used for clear products, or different effects such as metallic and frosted.

Berry M&H has developed a range of standard colours and selecting from this range will save both time and money.

Berry M&H has a team of dedicated project account managers who will help bring your concept to life from component selection to colour and final decoration.

Whether you choose from the Berry M&H portfolio of standard products or require a bespoke solution they will be there to help you every step of the way.

Please contact us on +44 (0) 1502 715518 to discuss your requirements or email sales@mhplastics.com.
